Join our dream circle and bring a dream which has been calling to you. Listen deeply to the voices of the images as they come alive to offer insights and transformation. Hear the wisdom of ancestral callings, the instinctual power of animal visitations, and the musings of the soul. All are attended to with sensitivity and care as the intelligence of the dream is listened to from the inside out.

Dreams carry an inner knowing, an innate sensibility, and an element of potency that affords each of us the capacity to open to the depths of our own experience. When we tend a dream, images come 'awake,' imagination is animated, and we participate in life more fully rooted in the ground of our being. From this ground we experience the support to grow our creative wings and expand our vision to encompass wholeness.

JoHanna McNamee, MA earned her Master's degree in Depth Psychology from Sonoma State University and is certified in *DreamTending* from Pacifica Graduate Institute. She blends Jungian Psychology with creative process, such as nature sculpture, collage and mask making, to explore the hidden realms of psyche. She currently leads groups and workshops, and sees clients on an individual basis. *Phone sessions* also available. **(928) 301-4343** or www.SedonaDreamer.com
